ENAMEL FLUE - Premium

The NEW range of enamelled connecting flue pipes is particularly designed for stove connections and available in 5 different colours.

- Length, elbows and tees are seam welded
- High quality vitreous enamelled coating
- A good range of appliance connecting adaptor
- Enamelled access doors
- HETAS approved
- Fire-cement not required

Poujoulat *"designed with you in mind"*

Aesthetically designed with no flaring on the female, provides a clean straight joint which is pleasing to the eyes

A straight profile on joints push-fit spigot connection without the need of locking band for a tight and visually appealing system.

The round Ceiling Cover Ring completes the connection between the twin wall system chimney and the enamelled Connecting Flue Pipe to give a perfect finish.

Material	Locking band	Diameters
Enamelled Steel Thickness 0.7mm	Not required	100 - 130 - 150 - 180 - 200
